```

Add a Question?:
1▶Yes
2 No

OK

```

Add a Question? – This allows the Sender to ask a question and gather responses. The questions have four possible answer formats:

1. Yes/No
2. Number
3. Text
4. Multiple-Choice

```

Question Type:
1 Yes/No
2 Number
3 Text
4▶Multi-choice

OK          Cancel

```

The Sender will be prompted to first select the question type, then to enter the question; and for multiple-choice questions, the Sender is prompted to enter a list of possible answers delimited by commas.

At the end of each question added, the Sender is asked if another question is to be added. This process repeats until the Sender chooses No.

```

Enter Question:

```

```

Add Another
Question?:
1 Yes
2▶No

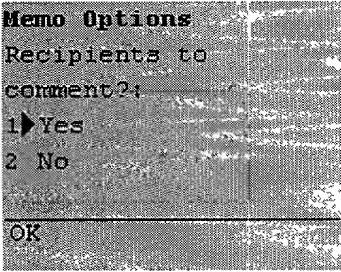

OK

```

Fig.11C

Subject of the message.

Recipients to Comment – This functionality allows the Recipients to make comments regarding the memo (meeting or event, as seen below). These comments are stored and can be viewed by the Sender, or if the Sender chooses, all Recipients may also view them.

Show Recipient's List? – This functionality allows the Sender to specify whether the Recipient list is visible to all Recipients. The Sender has the ability to turn off this feature so that no other Recipient sees the Recipient list. This feature also controls whether the Recipients can see the Comments outlined above.

Message Body – This is the actual message text.

Add Recipients:

- 1▶ Enter Mobile#/Email
- 2 Choose Group
- 3 Choose Contact
- 4 Save and Send
- 5 About this page

OK Cancel

Add Recipients – The user can add a cell phone number (a phone number that has the ability to receive email or SMS messaging as defined further below) or email address by simply typing it in manually.

1. The user can choose a Group from their address book. These can be added from the Address book, which is outlined in Appendix A – Address Book.
2. The user can choose a Contact from their address book. These can be added from the Address book, which is outlined in Appendix A – Address Book.

When finished adding Recipients, the function "Save and Send" will save the event and the system will prompt the user "Send Message <subject name>?"

1. Yes
2. No

If yes, the message is sent and the user gets a confirmation.

If no, the message is saved as a draft for later usage by the Sender.

After the message is sent, the Sender is shown a view of the message, which includes the default Card Graphic. The graphic card is formatted to be available to different devices based on the capabilities of the device: from a Macromedia Flash animation on a desktop browser, to a color graphic on a WinCE PDA, to a 1-bit black and white bitmap on a WAP phone.
